

## **\$1.6 Million In New Contracts For WPCS Includes Traffic Monitoring System**

**EXTON, PA - (PR Newswire-First Call) - October 11, 2005 - NASDAQ: WPCS – News)** WPCS International Incorporated (WPCS), a leader in wireless infrastructure services and specialty communication systems has announced that it has recently been awarded a variety of new contracts totaling \$1.6 million for wireless infrastructure services and specialty communication systems. Included in the contracts awarded to WPCS are projects to be completed for the Field Iron Worker's Training Facility located in Benicia, California, the State of Ohio Environmental Protection Agency, ICM Corporation and New Jersey Natural Gas.

In addition to these contracts, the California Department of Transportation (Caltrans) has chosen WPCS, through their Clayborn Contracting subsidiary, to install a specialty communication system which includes changeable message signs and a traffic monitoring camera system in various locations throughout San Luis Obispo County. The system will allow Caltrans the opportunity to monitor traffic flow and alert motorists of weather-related issues, accidents, general traffic congestion and issue amber alerts when necessary.

Chuck Madenford, President of the WPCS/Clayborn Contracting subsidiary, commented, "WPCS has established a leadership position in the design and deployment of specialty communication systems for public safety, especially as it pertains to traffic management. Our engineering staff continues to develop its expertise in this area. Public safety is a fast growth sector and we hope it will continue to yield additional opportunities for our company."

About WPCS International Incorporated:
