

Wireless Seismology Project Among \$2.3 Million In New Contracts For WPCS

EXTON, PA - (PR Newswire-First Call) – January 11, 2006 - NASDAQ: WPCS – News WPCS International Incorporated (WPCS), a leader in engineering services for the wireless market has announced that it has recently been awarded a variety of new projects totaling \$2.3 million for specialty communication systems and wireless infrastructure services. Some of the contracts awarded to WPCS are projects to be completed for Underwood Memorial Hospital, First Alert Ambulance, Monmouth Emergency Management, Union County Prosecutors and Valero Refining Company. Also, contracts were awarded for the police departments of Princeton, Lakewood, Pemberton and Oakland, New Jersey.

In addition to these contracts, the Incorporated Research Institutions for Seismology (IRIS) has chosen WPCS to provide programmed wireless Airlink modems that will be used throughout the United States in conjunction with their seismograph data collection. Once installed, these modems will transfer data to the laboratories for processing and information sharing which will assist in the overall analysis of earthquake physics and volcanic processes. Also, the data will be housed in a shared database for retrieval allowing IRIS to further explore the Earth's interior.

Glenn Littman, Product Manager for WPCS/Quality Communications, commented: "When implemented, this project will provide IRIS with a unique method to utilize innovative wireless technology for the purposes of data collection in areas not served effectively through land line communications. The result is increased geographic coverage for the collection of data used for seismic monitoring that will allow IRIS to reinforce the efforts to mitigate potential earthquake and volcanic hazards. WPCS continues to create innovative and cost effective ways to deploy wireless technology that improves productivity."

About WPCS International Incorporated:

WPCS International Incorporated is an engineering company that focuses on the implementation requirements of wireless technology and specialty communication systems. The company provides a range of services including site design, product integration, security, structured cabling, construction and project management. The company has an extensive customer base that includes many major corporations, government entities and educational institutions. For more information, please visit our website at www.wpcs.com.
